

Dear HealthTrack Wellness Members,

We are pleased to announce the following changes to our Covid-19 masking & distancing policies as a result of the latest updates from the Governor's Executive Orders.

Effective immediately, masks must continue to be worn, covering one's nose and mouth, by anyone who has **NOT** received the COVID-19 vaccination. The order also states everyone must continue to practice social distancing while at any fitness center.

For those who are **FULLY** vaccinated and wish to remove your mask during your visit you are welcome to do so. While not required, we do encourage that all guests wear a mask in the common spaces such as weight room, lounge, pool deck, locker rooms and where social distancing is harder to maintain.

During this transition regardless of vaccination, we are asking our staff members to wear masks as we access social distance protocols for each department.

We wish to thank all of our loyal members and staff for their past and continued support during this very difficult and confusing time. Your co-operation and understanding has been instrumental in allowing us to remain open and to continue to provide our much needed services to the local communities.

With the utmost gratitude,

Cris Castillo
General Manager
