

Dear Member,

As you may already be aware, the Governor signed an Executive Order on Thursday once again requiring the wearing of facial masks, irrespective of vaccination status, inside businesses beginning **Monday August 30, 2021**. Just as we have always done throughout this pandemic, we will comply with the order without taking a political or personal stance. We do so in keeping with our dedication to being an invaluable service to our members and focusing on the safety and health of our community at large.

As we understand the order as of today, we are required to notify our members, staff and vendors that facial masks are required inside the building.

Details

- All persons are required and expected to wear facial masks while in the building other than stated below.
- Facial Covering is not required for anyone while eating or drinking
- Facial Covering is not required for members in the Pool, Steam Rooms, Saunas and Day Spa while receiving service.
- This mandate does not have any impact on our group or room capacities.

All of us at HTSW are very much appreciate for your past support during this pandemic and look forward to your continuing cooperation and support during what we hope will be a minimal interruption to our “norm”. With an approximate 70% vaccination rate in DuPage County, we are looking forward to the Governor giving our area more favorable considerations as promised.

We are also pleased to state that HTSW has **not** had a single report of Covid transmission from one person to another inside the Club since the outbreak last March. Please keep up the great job of maintaining personal spacing, cleaning touch points before & after usage, and maintaining the masking requirements as outlined.

Wishing you all the very best health!

Cris Castillo
